

The last six months has seen unprecedented demand for timber across the UK, Europe and World markets.

Log auctions are seeing a huge price spikes as raw material becomes more difficult to procure due to licencing constraints being issued as a result of the volume of appeals against felling.

We have absorbed a large proportion of these increases but it is impossible to continue to do so as we enter the final quarter of 2020. Extended lead times and the fact that we are having to commit to supplies with out actually agreeing a price is something our buying team have not experienced in their many years of working within the timber industry. That said, we are proactively hunting for lumber within our robust supply chain for the very best certified material for our customers.

Deliveries continue to arrive at our depots almost daily and although we will experience some length patches we WILL endeavour to meet the requirements of our customers.

We would urge our customers to speak to any member of staff to discuss their projects for the remainder of 2020 and we can advise you about specific section, length and specie availability on a job by job basis.

Please rest assured we are doing everything we can during these challenging trading times to maintain the supply that our customer expect and deserve.

Each member of our team are grateful for your custom and look for to servicing your building requirements for years to come.
